

Acclimol®

For transport 1 ml for 3 l water

Dosage: For the total aquarium content
10 ml for 40 l (8.8 imp.gal / 10.6 US gal) water.

Acclimol®

Your fish need JBL Acclimol because:

JBL Acclimol contains high-quality vitamins and plant extracts that allow aquarium fish to acclimatise to their new environment without problems and stress. Stress caused by catching and handling is quickly overcome and your fish soon feel completely at ease in their new surroundings. Acclimol will also help prevent new associated diseases from forming in the aquarium due to stress.

JBL Acclimol is effective by:

1. Providing the aquarium water with beneficial plant extracts and other natural ingredients.
2. Reducing stress from catching and handling when new fish are added.
3. Minimising the risk of disease.
4. Ensuring stress-free fish transport.

Always use:

- When new fish are introduced to an aquarium.
- After working in the aquarium.
- During fish transport
